Donated by: Chapter One

The Frog Scientist Book

“The latest volume in the Scientists in the Field series introduces us to Dr. Tyrone Hayes (one of our 2014 Wellness Festival speakers!), who researches the effects of pesticides on frog development as one possible cause of the rapid decline in amphibian populations around the world, a phenomenon not yet fully explained. Hayes comes across as both a dedicated scientist and a regular person, willing to work hard in pursuit of his scientific work yet quick to laugh and joke with his family and the graduate students he mentors. The result is one of the most compelling portraits of a scientific career the series has produced.”
Value: $ 15
